About Me

Dedicated and hardworking software developer with a strong background in both UI and Back-end development. Excels at problem-solving and embraces challenges as opportunities for creative solutions. Committed to teamwork and adept at collaborating with others to achieve shared objectives. Excited to leverage my skills and contribute positively to any dynamic team or project.

Career Objective

Passionate and skilled Back-end developer with creating designing efficient, scalable and reliable web applications. Contribute to a dynamic development team using my strong foundation in software engineering and Problem-solving. I intense about using my expertise in Back-end technologies to create impactful digital solutions that improve user experiences.

Experience

Role : Software Trainee
Organization : DCKAP Palli

Chennai | Sep, 2022 - Present

During my time at DCKAP Palli, I received extensive training in Full-stack web development. I have capability in UI and Back-end development. Beyond technical expertise, the experience enriched my Teamwork skills and effective collaboration within a team. Valuable interpersonal skills were developed and gained insight into professional behavior in the workplace. Furthermore, the program has improved my communication and programming skills. Now I'm currently working on team project named Inventory Management System.
